Cancer Science (formerly *Japanese Journal of Cancer Research*) is the official journal of the Japanese Cancer Association, and is published monthly. The journal was founded in 1907 as *Gann*, meaning cancer, by the late Dr. Katsusaburo Yamagiwa, who first produced skin cancer in experimental animals by painting tar on their skin. *Cancer Science* publishes original articles, editorials, letters to the editor, and reports describing original research in the fields of basic, translational and clinical cancer research. The following subject categories are covered: carcinogenesis, tumor biology and pathology, molecular biology and genetics, epidemiology and prevention, immunology and virology, or experimental therapeutics and clinical medicine. The Journal also publishes review articles which may be solicited or submitted.
